1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14,19,20 are drawn to a method of addressing a protocol data unit, classified in class 370, subclass 392.
- II. Claims 15-18 are drawn to a method of discovering the presence of a network, classified in class 370, subclass 432.

2. The inventions are distinct, each from the other because of the following reasons:

The above inventions are separate, distinct, and independent. Neither requires other for its implementation, they have separate statuses in the art as shown by their different classification. Each invention, if allowable, would be capable for supporting a separate patent. Therefore, restriction for examination purposes is proper.
